Education

JANUARY 2022 - PRESENT

Computer Systems Diploma / BCIT

Participants are introduced to solving object-oriented design problems and building applications in C++, along with using Algorithms, design patterns and higher-level computing skills. Students work in teams and gain hands-on experience with security foundations, how to leverage data communications and operating systems in advanced software and web applications.

JANUARY 2022 - PRESENT

ACIS Certificate / BCIT

Successful participants become expert end-user of a Windows personal computer, proficient in typical MS Office applications, followed by an introduction to web development and programming concepts.

Activities

FEBRUARY 2022 - PRESENT

BCIT Dev Club (VP & Cofounder) / BCIT

The BCIT Dev Hub was founded by a group of dedicated Part-time and Full-time students to create a connected community that promotes technological development for both Part-time and Full-time students from any department. We've hosted a variety of events to foster growth among students including study sessions, studio events, tours, bi-weekly leetcode sessions and a variety of other events
